Information Sharing

Opening: Sue Gardner

Sue opened the meeting and asked for introductions. Sue noted that Randy Kenagy, AOPA, was attending via the conference room phone. Sue commented on how much had been accomplished, how much there was yet to do, and noted that new people were coming soon. Sue provided an overview of the agenda and began with the Capstone Mission Statement and Goals. She explained “Bundled Technologies,” identified the Operational Enhancements provided by Capstone, and identified and defined the Emerging Technology Test and Demonstration projects for Capstone.

Phase I & II:

Ray Collins announced the new Garmin MX-20 software is coming, noting it will prevent much of the self-alert, 4096 code disparity seen on the Phase I aircraft. Leonard Kirk is preparing the training. The training for the changes in UAT operations will be provided before the upgrades are completed. Ray announced kudos’ to Jim Wright and all those performing the helicopter STC work in Juneau. It was noted that 27 helicopter installations remain.

Mark Olson briefed a slide depicting the five operational and five developmental locations of GBTs in the Y-K Delta. Mark briefed a second slide, which depicted site-by-site listing of available services.

Strategic Planning

Sue Gardner provided a briefing on the current planning for Capstone Phase III.

A copy of the briefing is posted on the Capstone web site:
